

Experience the Healing Power of Light.

Drug-free.
Natural.
Laser therapy.

ORTHO LAZER®

YOUR ORTHOPEDIC WELLNESS CENTER

PAIN RELIEF Starts Here.

* Who is OrthoLazer?

At OrthoLazer, Your Orthopedic Wellness Center, we believe that pain can't hold you down. Our innovative, drug-free laser therapy reduces pain, inflammation, and swelling—helping you return to what you love. Powered by our exclusive M8 Robotic Laser, our personalized approach heals orthopedic conditions at the cellular level, speeding recovery and empowering you to move pain-free every day.

* What is M8 Robotic Laser Therapy?

FDA-cleared to treat pain and inflammation, the Robotic Laser is the only high-powered laser that is non-invasive, painless, and completely free of the side effects and risks associated with other lasers used today. It was specifically designed to treat conditions without generating an excessive thermal effect, often felt as heat.

* How does it work?

Using a patented delivery system, light energy enters damaged cells and stimulates activity. This reduces pain and inflammation in the area, and speeds recovery of the affected area.

* What can I expect during treatment?

Depending on your condition, most patients need 6 sessions for acute injuries or 12 sessions for chronic conditions, scheduled over a 3 to 5 week period. Treatment times vary, but average 15 minutes. They are progressive in nature, so it is important that you complete the entire course of care recommended by the provider.

* Can OrthoLazer help with post-surgical recovery?

Yes! When surgery is your only option, speak to your doctor about receiving M8 Laser treatments at OrthoLazer following the procedure. Laser Therapy reduces post-surgical pain and inflammation, allowing you to heal much faster. With less pain and inflammation, you'll need less recovery time and will be back to normal activity much faster.

LASER CARE for Every Concern.
